Place: Hyderabad, India

## CAREER OBJECTIVE

Highly motivated and detail-oriented DevOps Engineer with strong hands-on experience building automated, scalable infrastructure and bridging the gap between software quality assurance and operational resilience. Seeking a challenging role in a reputed organization to leverage multi-cloud platforms, Infrastructure as Code, and GitOps pipelines to maximize deployment velocity, system reliability, and business growth.

## TECHNICAL SKILL SET

|                            |                                                                                                  |
|----------------------------|--------------------------------------------------------------------------------------------------|
| Languages                  | Java, Bash Scripting, Core Java                                                                  |
| Cloud Infrastructure       | Amazon Web Services (AWS) [EC2, S3, VPC, IAM, EKS], Microsoft Azure [VMs, Azure DevOps]          |
| CI/CD & Source Control     | Git, GitHub, GitHub Actions, Jenkins (Declarative Pipelines, Jenkinsfiles)                       |
| Containers & Orchestration | Docker, Kubernetes (Minikube, Managed Clusters, Deployments, Services, ConfigMaps)               |
| Infrastructure as Code     | Terraform, Ansible (Modular Playbooks, Configuration Management)                                 |
| Observability & Monitoring | Prometheus, Grafana (Dynamic Dashboards, Proactive Alerting)                                     |
| Automation Tools & Testing | Selenium WebDriver, TestNG, Cucumber (BDD & TDD Frameworks, POM Approach), API Testing (Postman) |
| Test & Defect Management   | JIRA, Requirement Traceability Matrix, Defect Life Cycle Tracking                                |
| Operating Systems & IDEs   | Linux (Ubuntu, CentOS, RHEL), Windows, Mac OS, Eclipse                                           |

## PROFESSIONAL DEVELOPMENT & CORE COMPETENCIES

- Infrastructure Automation:** Hands-on experience provisioning multi-cloud environments across AWS and Azure using reusable Terraform configurations.
- CI/CD Pipelines:** Proficient in designing and executing end-to-end continuous integration and deployment pipelines using GitHub Actions and Jenkins.
- Container Management:** Highly skilled in containerizing multi-tier software suites via Docker and orchestrating them within high-availability Kubernetes clusters.
- Full-Stack Quality Assurance:** Well-versed in implementing TDD/BDD automated test scripts, API testing via Postman, and complete lifecycle execution metrics.
- System Systems Admin:** Firm grounding in Linux core concepts, including shell programming, permission metrics, network troubleshooting, and package managers.
- Agile Methodologies:** In-depth understanding of SDLC, STLC, defect management procedures, and issue resolution workflows using enterprise JIRA.

## PROJECTS & PORTFOLIO

---

### Personal DevOps Portfolio & Cloud Automation

*Terraform, AWS, Azure, Ansible*

- Designed and hosted an online personal portfolio platform utilizing highly resilient AWS S3 architectures and CloudFront distribution paths.
- Automated the deployment of cloud networking schemas by writing modular configurations for AWS VPCs and Azure Virtual Networks.
- Enforced baseline environmental consistency across running Linux clusters by developing declarative configuration playbooks via Ansible.

### End-to-End Automated Continuous Integration Pipelines

*GitHub Actions, Jenkins, Docker*

- Engineered robust Declarative Jenkinsfiles to automate standard package execution, static lint checks, and artifact isolation scripts.
- Integrated GitHub Actions configurations to seamlessly deploy verified versioned container structures to production registries upon pull request completions.

### Containerized Architecture & Infrastructure Monitoring

*Kubernetes, Prometheus, Grafana*

- Constructed explicit Kubernetes manifest blueprints to configure scaling targets, service boundaries, and storage attachments for microservices.
- Deployed comprehensive Prometheus instrumentation layers and dynamic Grafana visualizations to capture host metrics and minimize target operational downtime.

### Battery Health Monitoring System using LoRaWAN

*IoT, LoRaWAN, API Testing*

- Developed a wireless tracking architecture to monitor real-time battery parameters including temperature, voltage, and electrical current profiles.
- Validated telemetry pipelines by utilizing Postman suite execution to verify data consistency across backend tracking layers.

## INTERNSHIP EXPERIENCE

---

### Network Engineer Trainee

**Jan 2024 -- May 2024**

Surya Tech Solutions

- Gained practical infrastructure experience managing physical network layers, cable routing installations, and structural connectivity validations.
- Handled localized LAN deployments using Cat5/Cat6 cabling profiles alongside diagnostic network validation routines.

## EDUCATIONAL QUALIFICATIONS

---

### B. Tech | Electronics and Communication Engineering (ECE)

**GPA: 7.15**

Vignan's Deemed University, Guntur, Andhra Pradesh

### Diploma | Electronics and Communication Engineering (ECE)

**Score: 76.6%**

VRS & YRN College of Technology, Chirala, Andhra Pradesh

### Xth (ICSE)

**Score: 75%**

St Ann's School, Ponnur, Andhra Pradesh

## CERTIFICATIONS

---

- **Cloud Computing** – Issued by NPTEL IIT Kharagpur (12 weeks, Jan - Apr 2023)

- **Introduction to Industry 4.0 and Industrial Internet of Things** – Issued by NPTEL IIT Kharagpur (12 weeks, Jan - Apr 2024)
- **Soft Skills & Mock Interview Essentials** – Certificate of Appreciation at VFSTR
- **Basic Fundamentals of Digital Marketing and Communications** – Media Dept at VFSTR
